## ► Quality-Flexibility-Competence

STRUBL stands for a medium size company in the plastic-packaging and packaging-system business. We act in three different business units (1) Flexibles (films and bags for industrial and consumer packaging) (2) Plug&Pack packaging systems and (3) Cleanroom packaging. The company is managed as a family company with more than 65 years of experience. Our special strength is to develop and produce on our customer demands.

This is made possible by our technical flexibility all over our value chain - extrusion, printing and converting - as well as our own engineering department, product and process development and our qualified and highly motivated staff to satisfy our customers needs.

We take care of our social responsibility and therefore we are.
